

## Criteria to move on to the Red Stage(state of emergency)

➤ “Red Stage” (Decided at the 20th meeting of the Osaka Novel Coronavirus-control Headquarters on July 3)

○ Revising the criteria for “the state of emergency (Red)”, and inform the residents that there are the signs that infections would spread more than expected and it might cause the lack of hospital beds

※Original criteria : when the occupancy rate of hospital beds for severe symptom patients reaches 70% and more within 25 days counting from the day the “Waring (Yellow)” light was turned on

### **【Current infection situation】**

○ The occupancy rate of hospital beds for severe symptom patients has and will continue to have a tendency to increase

#### **【 Occupancy rate of hospital beds for severe symptom patients 】**

Nov. 28	Nov. 29	Nov. 30	Dec. 1	Dec. 2
51.9%	53.4%	60.2%	60.7%	63.6%

○ The simulation of the number of inpatients (with sever symptoms) shows that the occupancy rate is expected to reach 70% on December 8 if the number of new cases remains at a present level, or on December 7 if the number increases 1.2 times

**Move on to the Red Stage**

# Requests based on the Response Policy at the Red Stage(state of emergency)

- ① Areas: Entire Osaka Prefecture
- ② Period: During the Red Stage 1(From December 4 to 15, 2020)
